EDUCATION

Vilnius University

Bachelor of software engineering
2022 - 2026

Lazdijai Motiejus Gustaitis gymnasium

2014 - 2022

PROJECTS

- Flashcard web app. Created using ASP.NET, Entity Framework, C#, HTML, CSS, JavaScript, SQLite, REST API, MVC pattern

- Collibri. A note-taking app. My responsibility for this project was to implement quiz functionality by using C#, React, HTML, CSS, Javascript, REST API, PostgreSQL

- Various optimization algorithms, including gradient descent (a technique commonly used in AI), implemented in Python and visualized using Matplotlib

ADDITIONAL LEARNING

- "Learn You a Haskell for Great Good!" by Miran Lipovača

- Lithuanian Young Mathematicians Extramural School 2020 - 2022

ABOUT ME

Immediately after graduating high school, I enrolled in the software engineering program at Vilnius University. I chose this field of study because I have always loved mathematics and puzzles that require some sort of problem-solving. Now I hope to get some real work experience in a field relevant to my current study program.

LANGUAGES ACQUAINTED WITH
(FROM MOST TO LEAST COMPETENT)

- C# .NET
- C
- HTML
- CSS
- JavaScript
- Python
- SQL
- Haskell
- Java
